PROFILE

Senior Software Engineer with five years of experience in designing data-driven applications across multiple domains. Skilled in full-stack development, building interactive software and scalable systems that transform complex data into actionable insights. Proven ability to optimize performance, lead technical projects, and collaborate with cross-functional teams. Passionate about solving real-world problems through technology.

TECHNICAL SKILLS

- Programming Languages
 - Python:
 - * Design and optimize backend APIs (Flask) for scalable web applications.
 - * Process large datasets and automate complex workflows
 - * Implement robust testing suites (pytest) and CI/CD pipelines
 - JavaScript/TypeScript: Develop high-performance web applications using modern frameworks (Vue.js/Alpine.js), with specialized experience in data visualization libraries (ECharts, Upset.js) for interactive analytics applications.
 - PHP: Architect scalable Laravel-based systems implementing MVC patterns, RESTful APIs, and secure authentication workflows.
 - SQL, MSSQL, SQLite: Design and optimize relational database systems for high-performance applications, implementing efficient query patterns and data access strategies.
- Testing
 - Implement automated testing pipelines for backend services and data workflows, ensuring reliability and maintainability.
 - SQLite: Implement SQLite for lightweight test databases and isolated test environments
- Frontend Development
 - Vue.js: Build responsive, production-ready applications with Vue.js/Alpine.js for complex business needs.
 - HTMX: Enhanced frontend interactivity with minimal JavaScript, improving performance.
 - TailwindCSS: Lead UI development with Tailwind CSS, design reusable components that accelerate prototyping while maintaining design-system consistency.
 - ECharts: Implement interactive charts and graphs for effective visualization of large datasets.
 - React & React Native: Build dynamic, component-based user interfaces for interactive and scalable web and mobile applications.
- Backend Development
 - Flask: Develop production-ready APIs and microservices for diverse applications.
 - Laravel: Build scalable backend systems for high-traffic platforms with robust security and performance.
- Data Analysis & Visualization

- ECharts: Design and implement dynamic data visualizations, e.g., real-time dashboards and reports, for complex datasets across industries
- Upset.js: Develop specialized visualizations for multi-dimensional dataset analysis, including overlapping sets.
- DevOps
 - Docker: Containerize applications for consistent deployment across environments and reduce environment issues.
 - GitHub Actions: Automate CI/CD pipelines to streamline development workflows.
 - Git: Collaborate across teams using Git for efficient version control and code reviews.
- Research
 - Healthcare Data Protocols: Researched and co-authored a paper on data-sharing frameworks.
 - Healthcare stakeholder engagement: Researched and co-authored a paper on stakeholder engagement.
- Soft Skills
 - Stakeholder Engagement: Bridged technical and non-technical teams to align project goals.
 - Technical Leadership: Mentored developers and led cross-functional projects.
 - Collaborative Research: Worked with researchers to publish findings on healthcare data.

EDUCATION

- **Artificial Intelligence Engineering** Oct 2025 Udemy
- **AWS Certified Cloud Practitioner** Aug 2024 - Dec 2024 AWS
 - Validated foundational knowledge of AWS Cloud services, architecture, security, and pricing models.
- **Introduction to Research Ethics** Jan 2024 TRREE(Training Programme in Research Ethics)
- **MSc Mathematical Science** Sep 2019 - Feb 2021 AIMS University, Senegal
 - Dissertation topic entitled: Complex networks based approach for understanding cell's structure, organization and functions.
- **BSc Actuarial Science** Sep 2014 - AUG 2018 Mount Kenya University, Kenya

PROFESSIONAL EXPERIENCE

- **Senior Software Engineer** Jan 2024 - Present WITS Health Consortium
 - Developed interactive healthcare dashboards using Upset.js, ECharts, and Flask, enabling real-time analysis of complex datasets for medical professionals.
 - Implemented HTMX and containerization (Docker) to optimize performance and scalability of data visualization tools.
 - Automated CI/CD pipelines using GitHub Actions to streamline deployment.
 - Collaborated with researchers and healthcare stakeholders to align technical solutions with clinical needs.
 - Designed comprehensive test suites with pytest for backend APIs achieving 95% test coverage.
 - Implemented SQLite-based test databases for isolated unit/integration testing of healthcare data workflows.
 - Integrated automated testing into GitHub Actions CI/CD pipelines to ensure reliability before production deployment.

• Lead Frontend / Software Engineer

Oct 2021 - Aug 2023

Tribus TSG LTD

- Built a full-stack web application with Laravel, Vue.js, and TailwindCSS for order tracking and job postings across Kenya.
 - * Order Tracking: Enabled users to monitor deliveries end-to-end, reducing customer support queries by 35%.
 - * Job Portal: Centralized job listings for employers and seekers, increasing platform engagement by 30%.
- Actively collaborated with cross-functional teams, utilizing Github as a collaborative platform, which introduced remarkable outcomes, including a notable 15% improvement in project delivery time and an impressive 10% boost in overall team productivity.
- Optimized backend queries and caching, improving system responsiveness by 25%.

• Blockchain Researcher

Aug 2020 - Feb 2021

Seysoo SARL

- Conducted an extensive review of existing blockchain research papers, articles, and publications. Identified gaps in the literature and contributed to the understanding of various blockchain concepts.
- Stayed updated on the latest trends and developments in the blockchain industry. Identified emerging use cases and potential areas for blockchain application.
- Researched blockchain integration for financial microservices, analyzing cost, security, and scalability trade-offs.

LEADERSHIP

Learning Ambassador - ALX Software Engineering North Africa

Feb 2023 - Aug 2023

1. Mentoring and supporting learners in the ALX Software Engineering program.
2. Facilitating knowledge sharing and fostering a collaborative learning environment.

Mentor - AI Ghana

Jan 2023 - Jun 2023

1. Providing guidance and mentorship to aspiring AI professionals.
2. Assisting mentees in their learning journey and helping them develop practical skills.

Secretary General - AIMS Senegal

Oct 2019 - Feb 2021

1. Held a leadership role in managing administrative tasks and organizing events.
2. Collaborated with the executive team to ensure effective communication and smooth operations of the organization.
